

# MATH GRANTS AVAILABLE NOW

Free PD Courses available to all teachers whose schools are participating in historic “**Million Student Study**”

Dr. Geoffrey Borman is embarking on a historic “**Million Student Study**” of the effects of the I CAN Learn® Program. This math solution has already received the U.S. Department of Education’s What Works Clearinghouse’s highest rating of “**Positive Effects.**”  Dr. Borman is a nationally recognized researcher from the University of Wisconsin-Madison. He is a Principal Standing Panel Member of the Education Systems and Broad Reform Research Review Panel of the U.S. Department of Education, Institute of Education Sciences. This new study is expected to be the largest Randomized Control Trial (RCT) of its kind.

- Along with the student courseware, the program’s parent company is offering free professional development classes through the prestigious NEA Academy to teachers whose schools are chosen for the study. If you are a teacher seeking to improve your math content knowledge, are teaching out of field, or simply wish to refresh your math skills, this program is for you. This online professional development package is available 24-hours a day and will help you achieve your math improvement goals.
