

The I CAN Learn® Education System

Your One Stop Intervention for all learners!

Adaptive Assessment + Engaging Instruction

Nationally, I CAN Learn® Math Teachers are using the software to reach various populations. Most use the program for intervention and we offer special resources that help ESL, Special Ed and Advanced students succeed as well.

Which student populations are enrolled in your I CAN Learn® Math class(es)?

The I CAN Learn® Program's lessons are presented so that all students are provided with access and opportunity to learn. Topics are presented using real-world examples that students can relate to and by using presenters from diverse backgrounds. The interactive lesson flow engages and appeals to all young learners.

Teachers agree!

*"Provides both visual and auditory teaching, **which helps our ESL students**. Allows students to work at their own pace. Provides specific solutions for students to gain a better understanding of math concepts."*

~Daphney Denton, Middle School Math Teacher

Some ICL® Teachers find their greatest success with ESL Students

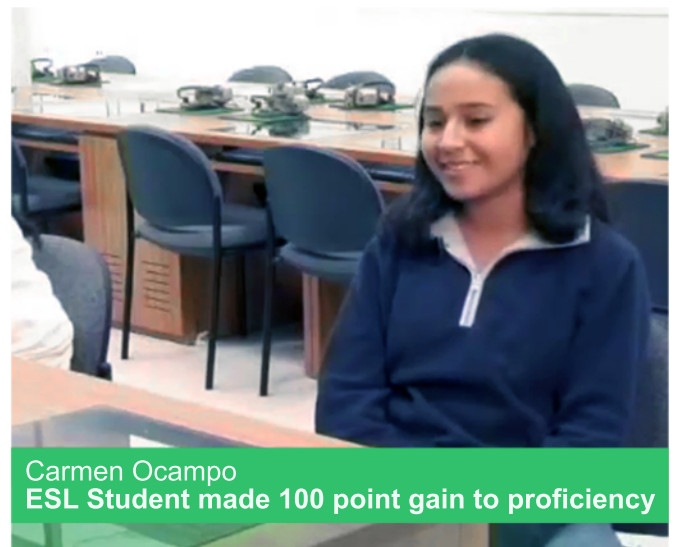

"The greatest success: My top student was a second year English Language Learner who increased her (state test) score by over 100 points and scored proficient"

~Vanessa Culp, Middle School Teacher

"Non-English speakers are surpassing the class!"

~Lorraine Gine, Middle School Teacher

"It's really what you use in real life!"

Carmen Ocampo
ESL Student made 100 point gain to proficiency
